Mansione	Data engineer
	<p>Data engineer e-BO Enterprises (Ypres and Ostend) is active in the field of software engineering, networking, security, cloud computing and infrastructure management. We create full-service solutions for the corporate world, public safety (fire department, police, prison system) and on & offshore wind farms. We already have more than 90 employees with a nose for innovation, a passion for technology and an unstoppable drive, but we still lack an extra data engineer. Your job content</p> <ul style="list-style-type: none"> • You gain insight into all data supplied: company-specific structured data, IoT data, third-party databases, monitoring data, and more, and you structure all of this. • You build and develop infrastructures in order to process large data sets: implementing infrastructure and algorithms in the business processes, so that your colleagues can work with these data flows. • Developing streaming and batch processes, building data landscape and cloud solutions, managing and optimizing data flows and data warehouses, creating real-time reports & dashboards, combining internal and external sources, implementing machine learning models, designing infrastructure for data lakes (storage of unstructured data flows), maintaining and optimizing the (cloud) infrastructure. <p>Your profile Of course, you will carry all e-BO core competencies with you: integrity customer focus flexibility communication result-orientation (no- nonsense approach) safety first We also expect the following from you:</p> <ul style="list-style-type: none"> • Delivering input and taking part in building and expanding our data processing architecture, with fit in the overall product design technology. • The implementation of features, which will be included in product releases. You have to pay attention to implementation speed, quality, security and adherence to the specs. • The translation of (technical) customer requirements to an implementation. This, if needed, in cooperation with the product feature development lead and the CTO. • It is expected that the development engineer aids, or provides input to the development of the implementation, planning, testing and documentation strategy. <p>The expected experience and skills:</p> <ul style="list-style-type: none"> • Master in computer science or electrical engineering • Experience with Java, html5, Javascript (React, node.js), Python, Data engineer • Experience with data modeling and implementation • Knowledge of data processing: SQL and ETL (Extract, Transform, Load), Cloud computing (K8s, Object storage) and Data systems: Spark, Hadoop, MongoDB, Redis, Cassandra... • Knowledge of Linux is an asset <p>Our offer An international growth company with strong internal dynamics: we guarantee you a lot of variety, trainings and the opportunity to develop yourself within the framework of our international expansion. You will make the difference: we are working with short decision lines and in small teams. Your job will have a direct impact on the results and requires a no-nonsense attitude. A great team in a top environment: all our employees are driven and result-oriented team players. We are working from 2 brand-new buildings: HQ Ieper, which fulfills a lighthouse function in the Ieper Business Park (on the corner of Ter Waarde and the Ringlaan in Ypres), and our office in Ostend (the first company in the Ostend Science Park). A right pay: in addition to a competitive salary, you will receive stock options of e-BO Enterprises and other fringe benefits. Are you interested in this vacancy? Send your CV by e-mail to Greet Demonie: hr@ebo-enterprises.com and cc eures@afolmet.it.</p>
