				<p>Are you ready to help shape the next generation of software-based video surveillance systems? When it comes to quality, would you like it to be up to you? Would you like to work independently, but in a small, dynamic team? Our video-analysis software products run as embedded systems in smart cameras; they are service-products and do not contain a GUI. To configure and monitor them, external front-ends are created based on web technologies - these are Rich clients and run completely autonomously. The work places the highest demands on your professional expertise, your quality-awareness and your reliability. After all, it is literally about the security of our customers. Are you communicative and quick-witted? Then you are at the right place with us! Your Responsibilities: <ul style="list-style-type: none"> • Independent design of complex front-end programs • Independent development with the aid of web technologies and the use of standardised libraries and tool sets • Validation and optimisation of the software you develop and provision of the technical documentation Your Profile: <ul style="list-style-type: none"> • Completed university degree in computer science (or equivalent) • Experience in the development of Rich-Clients with the aid of web-applications • Very good knowledge of JavaScript • Very good knowledge of IP-networks and the current browsers • Very good knowledge of the necessary Debugging-Tools (e.g. Wireshark) • Good knowledge of Tool-Chain and Libraries, e.g. jQuery, AJAX, etc. • Fluent German and good English skills both spoken and written Our highly interesting work on the pulse of the time requires constant further development and advanced training. A suitable salary, extensive social benefits and a group management, which not only calls employees 'the employees', but actually includes them in the further development of the company, complete the picture. Contract Term: Permanent Working Hours: Full-time send your application documentation in German (or English) to Email: zav-ips-baden-wuerttemberg@arbeitsagentur.de and cc eures@afolmet.it Job location: Munich (Bavaria) Ref. 4911494	UK	50	YFEJ 5.0 SW DEVELOPER ENGINEER - C / C++	<p>ALTEN was set up in 1988 by three French engineering graduates. Today, the company supports some of the world's biggest companies with their R&D and information systems projects. As a European leader in technology consulting and engineering with 24000 engineers in 20 countries, ALTEN has stayed true to its origins in engineering, which now more than ever before holds the key to the major challenges of the future. ALTEN Ltd is currently involved in innovation development for the IT, automotive, aerospace, railway and energy industries with premium customers in the UK. ALTEN currently offers opportunities to high potential engineers to join their teams in order to answer the continuous demand of customers and tackle exciting challenges. At ALTEN Ltd you will get a motivating environment, freedom in your work situation and career together with co-workers in the same field. Personal qualities that we value are the ability to act professionally as a consultant and to understand the client's goals and values. These include; someone who is positive, able to create and maintain long lasting relationships with our customers, thrilled by problem solving and able to use creativity and hard work to find new solutions. Qualifications required You are qualified to M.Sc. or MEng in Computer Science or related technical field. During your studies and/or your previous experience (internship, apprenticeship...) you have gained knowledge of a minimum 1 year of practical experience. Languages: English B1- French is a plus As part of our development in the IT sector, we are currently looking for SW Development engineers with strong experience in C / C++. If you wish to be part of an exciting project based in London area, you must have the following skills:</p> <ul style="list-style-type: none"> • A good knowledge of C and C++ languages • Comfortable using your relevant programming skills • Knowledge of JAVA, Unix as well as Oracle RDBMS and SQL is a plus <p>Please feel free to send your CV to Laetitia GALY : laetitia.galy@alten.co.uk and cc eures@afolmet.it</p>	31/12/2018	laetitia.galy@alten.co.uk and cc eures@afolmet.it
4911495	UK	50	YFEJ 5.0 NUCLEAR POWER PLANT LAYOUT ENGINEERS	<p>ALTEN was set up in 1988 by three French engineering graduates. Today, the company supports some of the world's biggest companies with their R&D and information systems projects. As a European leader in technology consulting and engineering with 24000 engineers in 20 countries, ALTEN has stayed true to its origins in engineering, which now more than ever before holds the key to the major challenges of the future. ALTEN Ltd is currently involved in innovation development for the nuclear, IT, automotive, aerospace, and railway industries with premium customers in the UK. ALTEN currently offers opportunities to high potential engineers to join their teams in order to answer the continuous demand of customers and tackle exciting challenges. Qualifications required You are qualified to M.Sc. or MEng in nuclear/energy or related technical field. During your studies and/or your previous experience (internship, apprenticeship...) you have gained knowledge of a minimum 2 year of practical experience. Languages: English B1- French is a plus At ALTEN Ltd you will get a motivating environment, freedom in your work situation and career together with co-workers in the same field. Personal qualities that we value are the ability to act professionally as a consultant and to understand the client's goals and values. These include; someone who is positive, able to create and maintain long lasting relationships with our customers, thrilled by problem solving and able to use creativity and hard work to find new solutions. Activities As part of our development in the nuclear sector, we are currently looking for Plant layout engineers as well as civil and layout CAD designers If you wish to be part of an exciting project based in Bristol area, your responsibilities would include: General layout engineering: Analysing and verifying technical consistency of the inputs regarding building layout (Process & Instrumentation Diagrams, equipment data, cable list, electrical load list, etc.), Carrying out layout engineering and making proposals to improve the layout. Lays out the various mechanical and electrical equipment. Design the pipes, HVAC ducts and electrical cable trays in the 3D model. Carries out an initial check of the consistency between the process & instrumentation diagrams and the 3D model. Drafting technical reports (progress reports, equipment introduction note, change impact analysis, design procedures, etc.). Issuing the layout drawings to the various teams and coordinating their layout activities by ensuring compliance with the layout rules. Civil and layout CAD design • Creating and modifying of the PDMS 3D-Model, by modelling: • components and equipments, civil structure, steelwork, pipe lines, HVAC ducts and components, Electrical cable trays, boxes and cabinets according to the input data and drawings provided and ensuring that the tractability is maintained throughout the model. • Carrying out layout engineering (positioning of equipment, pipe routings etc.), ensuring that the Layout Rules are correctly followed • When requests for changes are issued by the various engineering teams, he/she incorporates the changes into the 3D model, having checked their technical consistency. • In the event of any technical problems or deviations, informs the Building Layout/Civil Leader, offers technical advice and makes corrections to the 3D model. Produces 2D drawings associated with layout engineering (general layout drawing division into fire safety zones, etc.). • Performing of 2D-3D-Checks (3D-Model check against P&ID, Single line diagrams etc.) • Performing component introduction, installation or maintenance simulations; preparing layout studies. EURES Denmark n. 4690155	South Denmark	1	Consultant in Clinical Neurophysiology	Applications are invited for the post of Consultant in Clinical Neurophysiology, at the Department of Neurology Lillebaelt Hospital (DK), based at Kolding Hospital. This post is a replacement of a retired Consultant. The post holder will be responsible for providing and developing the full range of Neurophysiological procedures. The post holder will help deliver a modern and efficient Clinical Neurophysiology service at Lillebaelt Hospital, Kolding. This will include neurophysiological tests used in the investigation of peripheral nerve and muscle disease, electroencephalography, evoked potentials and other neurophysiological tests of the central nervous system. Other responsibilities include the supervision and training of 5 clinical physiologists in the department, in association with the Department Clinical Manager. The clinical physiologists perform much of the routine upper and lower limb NCS including a clinical physiologist led carpal tunnel service. The post holder will be expected to supervise this practice and report on all other NCS studies. The post holder will also carry out the more complex NCS and Needle EMG studies. A large number of EEGs are performed at the department. The post holder alone will be responsible for reporting EEGs, but within 18 months, another Consultant in Clinical Neurophysiology will complete her studies and return to the unit to take part in the responsibilities. There is a variety of evoked potential work carried out in the department (visual, auditory, somatosensory) which the post holder would report. Read more about our hospital here: http://ipaper.ipapercms.dk/RegionSyddanmark/Sygehus_Lillebaelt/Ikke_kliniske_afdelinger/Sygehusstaben/Kommunikation/111916/ Would you like to live and work in Denmark and expand your professional and personal horizons? Are you dreaming of a job with a high degree of specialization in an effective and socially well-functioning professional environment? Then come join us at Lillebaelt Hospital! Lillebaelt Hospital is a growing hospital with steadily increasing activity - and a strong focus on the quality of healthcare and treatment of patients. Lillebaelt Hospital includes 4 hospital units and is being developed towards three distinct profiles: 1. Kolding Hospital specializes in emergency cases 2. Vejle Hospital specializes in cancer and other major diseases 3. Middelfart Hospital specializes in spinal disorders at a regional level We offer: <ul style="list-style-type: none">• Permanent employment under secure terms at a salary subject to the applicable Danish union agreement.• Specialized job positions in a dynamic and cross disciplinary environment.• Committed colleagues• Opportunity for professional and personal development.• A good working environment that focuses on well-being and job satisfaction and work life balance With regard to your residency, we can help you with the more practical issues: Danish authorization, upgrading of needed qualifications, language course, residence- and work permits, housing, childcare, assistance with finding a job for possible spouse, etc. Are you interested? EURES Denmark n. 4690169	South Denmark	1	Consultant anesthesia	<p>Consultant anesthesia Permanent, full time 37 hrs./week</p> <p>Lillebaelt Hospital, Kolding - southern Denmark</p> <p>Department of Anaesthesia and Intensive Care</p> <p>We are currently recruiting senior consultants to join a major regional hospital situated in the heart of Jutland Denmark. The hospital has a catchment area of 300.000 and a major regional medical and surgical emergency hospital with a level 2 trauma center and a prehospital unit. The department delivers 13.000 anaesthetics and provides intensive care for 1000 patients yearly. We need a full time experienced Consultant Anaesthetist to support the delivery of Anaesthetic services to patients undergoing acute and elective surgery within the following specialities: vascular, orthopaedics, abdominal and gynaecology/obstetric surgery. The ICU is a multidisciplinary unit admitting both emergency medical and surgical patients. The hospital receives medical emergencies within the following specialities: infectious diseases, nephrology, cardiology and neurology. The applicant will be joining a dedicated, ambitious and professional multidisciplinary team of 22 senior consultants and 9 junior doctors. The Department is innovative and forward looking and is currently implementing on site simulation scenarios as a means of training both junior and senior doctors as well as nurses. Candidates with an interest and experience in anaesthesia for abdominal surgery and children are particularly welcomed. The individual will be required to play an active role in the general workload of the Anaesthetic Department while having a significant commitment to teaching and training of junior staff.</p> <p>Would you like to live and work in Denmark and expand your professional and personal horizons? 20151222733	Francia	30	YFEJ 5.0-DATA SCIENTISTS	<p>The role of the data scientist is to participate in the identification, implementation and growth of the it solutions. The data scientist is part analyst, part artist: comfortable working as a software engineer and a quantitative researcher; the Data Scientist is capable of staring at data and spotting trends, wanting to learn and bring change to an organization. The data scientist explores and examines data from multiple disparate sources and sifts through all incoming data with the goal of discovering a previously hidden insight, which in turn can provide a competitive advantage or address a pressing business problem. The data scientist does not simply collect and report on data, but also looks at it from many angles, determines what it means, then recommends ways to apply the data. The data scientist is inquisitive: exploring, asking questions, doing 'what if' analyses, questioning existing assumptions and processes. Armed with data and analytical results, the data scientist then communicates informed conclusions and recommendations across an organization's leadership structure. Skills - Understand the business of the customer and understand the main performance indicators that can be leveraged to improve activity or decrease costs - Work closely with customer facing teams and the customers to identify and answer relevant clients questions using appropriate statistical techniques on available data. - Drive the collection of new data, both internal and external, and ensure its accuracy. Drive the refinement of existing data sources. - Communicate findings to all relevant internal and external contributors in a way that is accessible to each audience. Experience with Python, R, Matlab, Scala with scoobi, Hadoop/Impala, tableau or equivalent, Unix is a plus Please send your CV in English to: eures@afolmet.</p>	31/12/2017	eures@afolmet.it
